913 BOERHAAVE, Herman (1668-1736). *Oratio de Commendando Studio Hippocratico habita cum Publicum Institutiones Medicas praelegendi Muntus in Academia Lugduno-Batava inchoaret*. Editio tertia. Lugduni Batavorum, Joh. Arnold Langerak, 1721. Small 4to. 36 pp. Bound in late 19th century boards (back strip gone; partly rubbed). Printer's device on title. "With this first public address as a medical teacher Boerhaave accepted his duty as lecturer of medicine... He felt that the medicine of his day should led back to Hippocrates" (Lindeboom). Bound with: HERMANNI BOERHAAVE, *De Usu Ratiocinii Mechanici in Medicina Oratio habita in Auditorio magno XXIV. Septembris A. MCCII* [atypo-error, should read 1703]. *Cum tertii sae Stationis anni labores auspicaretur*. Editio Tertia. Lugduni Batavorum, Apud Henricum Teering, MDCCXXX (1730). [vi], 46, [iv] pp. Small 4to. With printer's device on title. -- With this oration, which could also perhaps be considered as an honour bestowed by the Senate on the future profesor, he expressed his gratitude to the Govenors. The last four pages are: CATALOGUS LIBRORUM, Medicorum, Anatomicorum, Churgicorum & Botanicorum, que prosant in Officina Henrici Teeringh (sic). Including 5 titles Boerhaaviana published by Teering. -- Boerhaave's early disputations and ordations are rarely offered for sale today, the first editions of these are almost unobtainable at the antiquarian bookmarket. Lindeboom, Bibl. Boerhaaviana 16 & 21.--(Partly waterstained, but large paper copies). boerhaaviana hippocrates leiden university clinical medicine boerhaaviana 975.00€

902 BOERHAAVE, Herman (1668-1738). *Histoire d'une Maladie Qui n'a point encore été décrite ni expliquée. (&) Description d'une autre Maladie également rare & cruelle*. (Amsterdam), (Janssonius van Waesberge), (1731). [ii], 112, [ii] pp. 12mo. 19th. Century marbled limp boards. Very rare. First French translations of Boerhaave's only two case histories, both of particular interest: "Not only the manner in which these histories are composed is exemplary and models of description, but also the cases, both of illustrious patients, are most interesting. The first gives a description of a condition hitherto unknown and even now very rare: Spontaneous rupture of the oesophagus; the second of a very large tumor in the mediastinum. Sections were performed in both cases by Boerhaave and his colleagues" (Lindeboom).

These two papers were separated from: Charles BARBEYRAC (1629-1699), "Dissertations nouvelles sur les maladies de la poitrine ... Avec deux descriptions de maladies qui n'ont jamais été écrites, par Mr. Boerhaave". (Amsterdam, 1731, pp. 465-576). Lindeboom, *Bibliographia Boerhaaviana* 358 (first word of the title and publisher's address wrongly quoted; Boerhaave's contributions occupy pp. 465-576 and not 465-476 as erroneously stated). Small strip gone from the outer margin of the title page (not affecting any text); partly browned and some focings. pathology boerhaaviana oesophagus tumors clinical description case histories boerhaaviana 225.00€

912 BOERHAAVE, Herman (1668-1738).-- Two portraits of Herman Boerhaave on Dutch postal stamps. ('s-Gravenhage), (PTT), 1928-1938. [1] 5+3 cent, 1928; Green, ca. 2.3 x 2.8 cm. - [2] 12,5+3,5 cent, 1938; Blue/Grey, ca. 2.6 x 3.4 cm. Perfect unused copy. Yvert & Tellier (1975), nrs. 216 and 308. With new preface and indices. natural history botany zoology bibliography netherlands bibliography 22.00€

755 BONNET, Charles. *Considération sur les Corps Organisés (Ou l'on a rassemblé en abrégé tout ce que l'Histoire Naturelle offre de plus certain & de plus intéressant sur ce sujet)*. A Neuchatel, Chez Samuel Fauce, 1779. 2 volumes, (iv), 468; (ii), 550 pp. 8vo. Contemporary boards (partly slightly rubbed & dam.), entirely uncut. With 1 folded engraved plate. The last and best edition of this work, being vol. V & VI of *Oeuvres d'Histoire Naturelle et de Philosophie*. Including a 6 page additional note not to be found in other editions. An important work in which he i.a. attacks buffon's system of organic molecules. He often discusses the work and discoveries of Trembley and Needham, and he used numerous of Haller's arguments to support his own believe in the preformation of the embryo. g&m, 472 (ed. of 1762); Nordenskiöld 243-247: Of Bonnet's scientific theories the best known is his thoroughly worked-out preformation theory". -- Copy with ample margins. natural history zoology botany evolution biology embryology preformation theory genetics spontaneous generation natural history 185.00€

942 BONTEKOE, Cornelis, (1647-1685) [Devaux & Hunaut]. *Nouveaux elemens de Medecine, ou Reflexions physiques sur les divers états de l'Homme. Divisées en trois Parties. La premiere traite du corps humain & de ses operation. La seconde, des Maladies, & la Mort, & de leurs causes. Et la troisième, des moïens de prolonger la Vie & de conserver la Santé*. Nouvellement traduit en François par un Maître Chirurgien (Jean Devaux, 1649-1729). A Paris, Chez Laurent d'Houry, 1698. 4 parts in 2 volumes: (56), 333, (iii); (viii), 310, (xiv), 106, (iv) pp. Sm. 8vo. Contemporary calf, spine with raised bands, in compartment gilt lettered and decorated (partly worn at joints and corners). A good copy of this rare first French edition of Bontekoe's 'Werken', originally published in 1689 by S. Blankaart, who also wrote the biography of Bontekoe in the first volume ('Abregé de la Vie'). Bontekoe, who's real name was Dekker, was a famous cartesian, recommended the use of opium, the incessant smoking of tobacco, and the continual drinking of tea, or sometimes coffee, for

health and prolonging life. He supported Sylvius' theory of acid and alkali. The fourth part is: HUNAULT, 'Discours Physique sur les proprietes de la Sauge, & sur les reste des Plantes aromatiques, dans lequel par occasion l'on traite de la dissolution des corps, & de la digestion des alimens dans l'estomac' (122 pp.). Banga 627; Bayle/Thillaye II, 15; Thyssen-Schoute, 276. The N.U.C. gives two locations in U.S. libraries.-- Inscribed on the fly-leaves by Jacobi Collange, 'Chirurgien' (1751). pharmacy tea coffee opium therapeutics de cartes cartesian v.o.c gastronomy beverages tobacco sylvius medical botany prolonged living general medicine 975.00€

940 BORDEU, Théophile (1722-1776). Recherches sur le Tissu Muqueux, ou l'Organe Cellulaire, et sur quelques Maladies de la Poitrine... On y a joint une Dissertation du même Auteur, sur l'usage des Eaux de Baréges, dans les Ecrouelles. A Paris, Chez Pierre Franç. Didot le jeune, 1767. Bound with: L'Usage des Eaux de Baréges et du Mercure, pour les Ecrouelles: Ou Dissertation sur les Tumeurs scrophuleuses, Qui a remporté un Prix à l'Académie Royale de Chirurgie, en 1752. Nouvelle Edition, corrigée. A Paris, Didot, 1767. 2 works in one volume: (iv), x, (ii), 227, (iii); (iv), x, (viii), 228 pp. Sm. 8vo. Contemporary marbled calf, spine with raised bands, in compartments gilt lettered and decorated with fleurons (top of spine very slightly rubbed). A fine copy. The first work in FIRST EDITION, being of the first work to postulate internal secretions via cell membranes: it is one of the most important works in the history of cell theory (see DSB II-302). . Jourdan, Biographie Médicale, 402: "Pour louer dignement ce bel ouvrage, il suffit de dire qu'il donna certainement à Bichat l'idée de son Anatomie générale, et qu'il en devint un chapitre, par un de ces heureux larcins que Bichat a su se faire pardonner en y joignant une foule de remarques qui n'appartenaient qu'à lui." Bordeu was the principal representative of 18th century French clinical medicine, and played a great role in the history of medical theories. "He held that the organs of the body, with their several functions are federated with and dependent upon each other... Bordeu first stated the doctrine that not only each gland, but each organ of the body, is the workshop of a specific substance or secretion, which passes into the blood, and upon these the integration of the body as a whole depends. Thus Bordeu, as Neuburger has shown, was very close upon the modern theory of the internal secretion and 'hormonic equilibrium'..." (Garrison). DSB, II, 301: "The part that Bordeu played in the history of thermalism has caused him to be considered the founder of modern hydrotherapy..." hydrotherapy internal secretion cytology thermalism physiology vitalism cell theory anatomy - physiology 975.00€

1372 Clutius.-- SWAN, Claudia. *The Clutius Botanical Watercolors. Plants and Flowers of the Renaissance*. New York, Harry N. Abrams, (1998). 143, [i] pp. 4to. (24 x 33 cm.). Original publisher's cloth with coloured dust jacket. 149 illustrations, including 142 plates in full colour. This work presents a deluxe portfolio of rare and precious botanical art. Painted in Holland in the late sixteenth century by an unknown hand or hands, these magnificent images were collected by the pharmacist Theodorus Clutius. Much admired and copied in their own day, they later traveled to Berlin and for a time after World War II were thought to be lost. They have never before been published in this format or extent. For Lovers of botanical art these exquisite and unique works are therefore a remarkable discovery: rivaling the drawings of Leonardo da Vinci and Albrecht Dürer in beauty and accuracy, they represent that dramatic time when brilliant artistic expression matched groundbreaking scientific inquiry: the era we call the Renaissance. Prof Claudia Swan has studied these remarkable works in the collection of the Jagiellon University Library in Kraków, Poland, and made a selection of 142 watercolors for the present volume from some 1800 pictures. Her accompanying essay sets the watercolors in the context of both the art and science of the period. Each flower, plant, tree, and herb is reproduced in color and with meticulous care—nearly all as full-page plates. botanical illustrations watercolors history of botany iconography pharmacy materia medica collections botany - medical botany - mycology 50.00€

921 EUSTACHI, Bartolomeo [EUSTACHIUS] (ca. 1510/20-1574). De Ontleedkundige plaaten van B. Eustachius, met eene Verklaring van dezelve, vervaardigd onder toezigt van wijlen den Hoogleraar A(ndreas) BONN (1738-1818); Met een aanprijzend voorberigt van G(erard) C(oenraad) B(ernard) SURINGAR (1802-1874), Hoogleraar in de Ontleed- Natuur- en Heelkunde aan de Doorluchtige School, te Amsterdam. Te Amsterdam, bij Lodewijk van Es, 1830. Two volumes: xiii [i], [82] pp. Folio (25.5 x 40 cm.). Late 19th century red cloth (stained), uncut.. With 47 plates on 38 engraved copper plates, of which 8 with partial contemporary hand colouring. The plates are re-engraved after the plates by de Wandelaer made for the Albinus edition of Eustachius (1744). Very rare, being a reissue of the remainder of the original plates and text sheets of 1798 with only a new title page and preface by Suringar. 'A romantic history attaches to this fine collection of plates, drawn by Eustachius himself and completed in 1552. They remained unprinted and forgotten in the Vatican Library until discovered in the early 18th century, and were then presented by Pope Clement XI to his physician Giovanni Maria Lancisi. The latter published them in 1714 together with his own notes. These copperplates are more accurate than the work of Vesalius. Singer was of the opinion that had they appeared in 1552 Eustachius would have ranked with Vesalius as one of the founders of modern anatomy...' (Garrison & Morton 391). Chouland (p. 202) don't mention this edition.-- (Light waterstain in the upper corner of a few leaves, a few plates partly slight foxed, but a very good copy). anatomy de wandelaer atlases anatomical illustrations anatomie iconographs anatomy - physiology 1475.00€

756 FRITSCH, Gustav Theodor (1838-1927). *Das Haupthaar und sine Bildungsstätte bei den Rassen des Menschen.* Berlin, Georg Reimer, 1912. (viii), 70, (ii) pp. Royal folio. Original half cloth (slightly faded & soiled). With 1 illustration and 128 photographic illustrations on 30 folio-plates (helio engravings). A remarkable iconography and synthesis of author's long researches. An important work on the classification of races according to texture and shape in sections of hair. Fritsch, pupil of i.a. Helmholtz and Langenbeck, was professor of medicine at Berlin, and an experienced scientific traveller. His researches on *Gymnotus electricus* are classics. He showed (1870) that electrical stimulation of the frontal cortex in various experimental animals caused movements of the extremities of the opposite side of the body, thus proving the existence of a motor area in the cerebral cortex (g&m, 1405). *Boring* 73-75; *DSB V*, 197; *Hirsch II*, 628 & *Ergbd.* 304. -- (One leaf loose). anthropology anatomy physiology hair racial theories anthropology 135.00€

785 FRORIEP, Robert (1804-1861), [editor]. *FRORIEP'S NOTIZEN aus dem Gebiete der Natur- und Heilkunde, gesammelt und mitgeteilt.... Jahrgang 1856-1857.* Jena, Verlag von Friedrich Mauke, 1856-1857. 191 fascicles; 8 volumes bound in two: [xvi] pp., 1506 columns; [xvi] pp., 1552 columns (1561 p. 4to. Late 19th century marbled boards. With 8 lithographed plates, of which one, a sepia tinted plate of pearls, in a mezzotint manner, some figures in the text. A most interesting bi-weekly demonstrating the state of the art of experimental biology, surgery and some medicine. Comprises articles, reports, book reviews, etc. Some topics: anaesthesia, electricity, neuroanatomy, cholera, orthopaedics, public health. To name but a few authors: Karl Ernst von Baer (*Kaspische Studien*), R. Virchow (*Congenitale Nierenwassersucht*), J. Dalton, O. Schmidt, J. Snow, Remak, Bretonneau, de Quatrefages, R. Leuckart, Kussmaul, Brown Sequard, Czermak, Meckel, Moleschott, G.J. Mulder, and many others who have contributed to the growth of life sciences that time. This series was founded by Ludwig Friedrich von Froriep in 1821 under the title *Notizen aus dem Gebiete....* In 1849, after the publication of vol. 100 Robert Froriep changed the title in *Tagesberichte über die Fortschritte der Natur- und Heilkunde* (1850-1852). In 1856 a new series was started under its old name, of which the present tomes are the first two volumes. With the death of the editor in 1861, the series was halted. pathology periodicals medicine surgery experimental biology anaesthesia von baer virchow general medicine 225.00€

727 FUERSTHEHAU, R., M. IMMELMANN & J. SCHUETZE. Leitfaden des Röntgenverfahrens für das röntgenologische Hilfspersonal. Stuttgart, Enke, 1914. xii, 402, [ii, advs.] pp. 8vo. Original cloth (slightly faded). With 281 illustrations. The first decade of Röntgenology shows a remarkable growth of its application in diagnosis and therapy. With this growth, the need for well trained paramedic assistants became evident. The present work is one of the first works in Germany to serve this purpose. Most of the illustrations (210) deal with electricity, the Röntgenological equipment, techniques, laboratory etc. röntgenology physical diagnostics electricity in medicine instruments radio therapy diagnostics - röntgenology - radiology 55.00€

1500 JUSTE & Cie Fabricants Tourneurs-Decolleteurs. Catalogue Générale Illustré: Appareillage Electrique. Paris, Juste, (1909). 72 pp. 4to. (22 x 27.5 cm.). Original printed wrappers (top of spine slightly damaged; slightly discolored). With a large number of engravings in the text. A very well illustrated and detailed catalogue of electrical appliances by one of the leading Paris firms of that time. Loosely inserted is an illustrated leaf printed on blue paper: Lampes Electriques de Bicyclette fonctionnant par Accumulateurs by the manufactory F. Kraemer (accumulateurs mignons). - (Stamp on the first page). scientific instruments electricity electrical appliances technology ephemera - publicity - trade catalogues 80.00€

910 KAAU BOERHAAVE, Abraham (1715-1758). Impetum Faciens dictum Hippocrati per Corpus consentiens Philologica et Physiologica illustratum Observationibus et Experimentis passim firmatum... Lugduni Batavorum. Samuelem Luchtmans & Fil. 1745. Small 8vo. [xxii], [ii blank], 480 pp. Contemporary vellum (top and bottom of spine very slightly damaged; two small wholes in the middle of the spine and one in the middle of the first side), uncut. Title-page printed in red and black. B.M.N. I, 119; Baumann, 236; Hirsch III, 436-437; Bayle-Thillaye II, 411. This is one of the most remarkable Dutch medical books of the 18th century. In it the author developed his theory about a substance between body and soul, the Hippocratic 'enormoon'. Written in perfect Latin and grangerized with philological notes, quotes from the Bible and poets. The work includes many surprising statements. In fact the work is a treatise on sympathetic medicine, though with a bizarre title, and is author's best work. Abraham Kaau Boerhaave was a nephew of Herman. He first practiced in the Hague and later in St. Petersburg (director of the naval-hospital and in 1743 professor of anatomy and physiology). Copy with the bookplate of famous American biologist Charles Atwood Kofoid.--(Partly some foxings and/or slightly browned, but overall a good copy). hippocrates enormoon physiology common diseases classical philology boerhaave natural healing sympathetic medicine neurology natural magic boerhaaviana 160.00€

751 MONCHY, Salomon de (1716 - 1794). Korte Onderrigting en Raadgeving aan de Bevelhebberen over het Krygsvolk, naar de Kolonie de Berbice geschikt, waar naar Zy hunne maatregelen zouden kunnen inrigten om de Officieren, en inzonderheid de Soldaaten, zo op de Schepen, als aan de Wal, tegen de woede der gewoone Ziekten in de verzengden lustreek te beveiligen en te behoeden. [Rotterdam?], Gedrukt voor den Auteur, 1763. 24 pp. 8vo. Moddern wrappers, uncut. Extremely rare, privately published, booklet of which no other copy could be recorded. Moncy, for a time, contributed substantially to improve the ability of the surgeons on board of the Rotterdam trading vessels. It seems that this work was published for political purposes. In fact it is a kind of abbreviation of his prize essay published in 1759 (Verh. Holl. Mij.) which was also published in London as: An essay on the causes and cure of the usual diseases in voyages to the West-Indies: together with the presevatives against them...., a classic on naval medicine. His further career was more or less abruptly teminated owing to his patriotism.-- (Unfortunately half of the last leave is missing with loss of some text; some slight foxing.) naval medicine tropical medician coc west indies military & naval medicine 425.00€

818 MONS, Jean-Baptiste van (1765-1842). Pharmacopée Manuelle.... A Bruxelles, emmanuel Flon, an 9 [1800] xx, 235, (i) pp. 8vo. Contemporary half calf (head and foot of spine dam.; joints weak; sides rubbed). The late Apr. E. Grendel's copy with his bookplate. With the printed dedications to Lavoisier. A rare and highly important publication, and a revolution in the pharmaceutical literature. The work includes van Mons' plea for an European pharmacopoeia. Not in Volckringer. Guislain p. 153; Vandewiele p. 255. -- (Small hole in the lower margin of 1 leaf; partly foxed.) pharmacy pharmacopoea formularia pharmacopoeia - formularia 200.00€

657 MUELLER, Fritz. Populaere Anatomie und Physiologie des menschlichen Koerpers in ihrer Beziehung zur orthopaedischen Technik. Ein Lehrbuch ... fuer Orthopaediemechaniker und Bandagisten. Muenchen, Ludwig Empfenzeder, 1919. xi, [i], 204 pp. 4to. Half cloth (original printed wrappers pasted on sides; slightly worn and discoloured). With 14 large coloured lithographed anatomical plates (two plates with cancelled figures and their replacements pasted over), and 124 illustrations in the text. A wellknown German anatomy and physiology for the orthopaedic technician. Including many illustrations of orthopaedic deformities. There is a brief, but outstanding "Geschichte der Orthopaedie", which including includes interesting illustrations of ancient orthopaedic appliances. The author was teacher at the reputed Fachschule fuer Orthopaedie und Chirurgiemechnik at Muenchen. -- (Light waterstain in the lower corner of the first 18 pages; some occasional slight foxings). orthopaedics orthopaedy paramedic anatomy physiology deformities appliances orthopaedics 65.00€

724 MUSEE DE L'HOPITAL SAINT-LOUIS, Le. Iconographie des Maladies Cutanées et Syphilitiques avec texte explicatif par MM. Ernest Besnier, A. Fournier, Tenneson, Hallopeau, Du Castel avec le concours de M. Henri Feulard, secrétaire générale: M.L. Jacquet. Paris, Rueff et Cie, (1895-1897) (ii), iv, 346 pp. Folio. Quarter red chagrin, spine with raised bands, gilt lettered, uncut. Illustrated with 10 photographs, 43 wood engravings, and 50 large coloured plates. All published (5 fascicules) of this rare and monumental work. No copy recorded in the cat. Bibliothèque Nationale. The work was realized through the combined effort of the best dermatologists of that period in France. Together with over 20 entries in G&M. The unsurpassed chromolithographs in this work were made by Lemerrier, the unrivalled master. The aim of this work was to provide a diagnostic tool with suggestions for a rational treatment of the various cutaneous diseases. The material presented was based on the rich collection of the museum of l'Hôpital Saint-Louis, the finest in the world on the subject. The Musée, founded in 1866 started with the modest collection Devergie of watercolours and photographs. By 1895 the collection became the most important in the world. The most important part of the collection are the MOULAGES (three dimensional coloured mouldings). The master mouleur was M. Baretta, a highly gifted artist. His first moulage was created in 1867, and the end of 1894 he had created 1800 mouldings of incredible quality. The splendid life-size plates in this work are all after the MOULAGES of this great medical artist, and are superior to watercolours and photographs as employed in other dermatological iconographies.--(Partly some slight foxing on text leaves and margins of the plates, but a fine copy). dermatology iconography moulages wax models venerology chromolithography dermatology - venerology 1200.00€

703 Museum Spitzner.-- Verklarend & Analytisch Katalogus der beroemde oudverzameling van Dokter Spitzner... (Bruxelles), (Imprimerie Mondial), (ca. 1915). 32 pp. 12mo. Original printed wrappers. A rare booklet of which only one other copy could be recorded. It is probably the only printed catalogue of the 'Museum Spitzner' of pathology and hygiene, or at least what was left of it. There are 380 items described, and the supplement devoted to venereal diseases has 74 items. Sigmund S. Spitzner (1813©1894) received his MD at Vienna in 1837. In 1839 he was appointed professor of Anatomy at the medical school of Constantinople. Here he successfully put aside the ruling prejudices against obduction, and started to build an anatomical museum. This collection was composed of Spitzner's own material, and preparates obtained from Joseph HIRTTL. In 1844 Spitzner became director of the Medical Clinic, and later director of the Academy of Medicine. Meanwhile he had cured the Sultan Abdul Medzjid from a serious illness, and became the latter's personal physician and confidant. He represented the Ottoman Empire as diplomat in Naples, and later diplomatist for Austria and the Ottoman Empire during the Crimean War treaty. The evening of his life was spend alternate in Paris and Italy. He died at the age of 80 in Vienna. According the preface of this catalogue, the 'Museum Spitzner' was founded in 1856, and traveled throughout Europe. It attracted many spectators and gained world fame. The burning question; how did the collection come to Belgium? remains unsolved. At the time this catalogue was printed, the collection was owned by G. Geluck of Brussels,

who probably compiled this catalogue. By this date, it did not serve any scientific purpose, but merely as a curious attraction. The items representing venereal diseases were used as a repressive argument against sexual relation, by showing the youth the morbid consequences of sexually transmitted diseases. musae collections venereal diseases preparates pathology anatomy teratology cabinets curiosities musea - cabinets - collections 165.00€

1438 NAVARRE, Albert. L'Exposition de 1900. Description des Monuments, Palais, Pavillons et des principales merveilles exposées. Accompagnée de plans détaillés et de nombreuses illustrations. Paris, Institut Stenographique de France, (1900). 128, xxxii pp. 8vo. (16,5 x 25 cm.). Original decorated red publisher's cloth (slightly discoloured; gilt decoration faded). With numerous photographic plates and plans.--(Outer edges slightly bowed). A rare typographic curiosum from the presses of P. Féron-Vrau of Paris. The text is entirely set in stenography (shorthand). The last 32 pages are a description of various type writers of which 26 are illustrated by a wood engraving. Including the Hall type writer for the blind and the Anderson shorthand writer. All together very useful information on early type writing. The author A. Navarre was France most ardent advocate for stenography and the editor in chief of the periodical "Sténographie Illustré". stenography shorthand stenographie world expositions paris typography type writers industrial revolution writing art design - typography 75.00€

928 PHARMACOPOEA BELGICA.-- *Pharmacopoea Belgica Nova (Editio I) [bound with: Pharmacopée Belge par A.D. de Hemptinne, J. Mareska, M. Martens, et al]. Bruxelles, J.B. Tirschler & Vandooren, 1854. Two parts in one volume: [xii], xxiv, 374; [x], xxvii, 446, [ii] pp. Large 8vo. (16.5 x 26 cm.). Late 19th century cloth, spine gilt lettered (slightly faded). With some tables. Very rare first official pharmacopoeia for Belgium, which replaced the combined Dutch-Belgium Pharmacopoea Belgica of 1823. In order to avoid mistakes the word 'nova' was added. The French translation added is not an official translation: "'La Pharmacopoea Belgica sera imprimée en langue latine. Aucune traduction dans une autre langue n'y sera reconnue légale sans notre autorisation'"'. Vandewiele p. 307; Volckringer, 394. pharmacopoeia pharmacopoe pharmacy formularia pharmacopoeia - formularia 285.00€*

820 Pharmacopoea Neerlandica.- *Nederlandsche apotheek (Editio I)*. 's Gravenhage, ter Algemeene Lands-drukkerij, 1851. [ii], xxii, 557, [i], xvi, xxiv, [ii] pp. 8vo. Contemporary half calf (slightly rubbed), spine gilt lettered. With 1 folded table. First edition of the Pharmacopoea Neerlandica, simultaneously published in Dutch and Latin. This work is a quite remarkable book. Owing to the strong influence of Gerrit Jan Mulder it

became rather a textbook of pharmacy & chemistry instead of a pure pharmacopoea with a so far unseen size of 600 pages. The book had a strong influence on Dutch pharmacy, and initiated numerous experiments and observations (Stoeder 399). It was probably also due to Mulder's authority, that the Commission responsible for the new Dutch pharmacopoea was joined, for the first time, by an pharmacist; Anthony Johannes d'Ailly (1793-1851) of Amsterdam, a notable event in the history of Dutch pharmacy. -- (With the stamp of F.G. Gantzert on title page & p. iv). pharmacopoeia pharmacopoe pharmacy formularia pharmacopoeia - formularia 185.00€

665 Pharmacopoea.- PHARMACOPOEA GANDAVENSIS Nobilissimi Senatus justus Renovata. Gandavi, Typis Judoci Begyn, 1786 (= 178 [10], 466, [ii] pp. 4to (20 x 24.5 cm.). Modern blind wrappers. Bound with: ORDONNANTIE van Heer ende Weth der Stad Gend, op den TAUX der Drogen en Medicamenten, Raelende de Pharmacie van de Apothecarissen der voorzeyde Stad. Tot Gend, By Judocus Begey, gezworeen Stads-Drukker (1787). [iv], 44, [iv] pp. An interesting municipal pharmacopoea, published by order of the Collegium Medici Gandensis under the editorship of the pharmacists J. de Bever, A.D. Goormachtigh, G. van den Haute, and J. de Vos. The popular names of the Materia Medica also give in Dutch. This was the last of a series of the municipal pharmacopoeas of Gent. The first was published in 1653 as 'Antidotarium Gandavensis', followed by an edition in 1663, and in 1756 as 'Pharmacopoea Gandavensis'. This is the last municipal pharmacopoea published in Belgium, and new was that the names of the Materia Medica are given in both Latin and Dutch.-(A number of leaves slightly browned; partly foxed). pharmacopoea pharmacopoe pharmacy taxen antidotarium gent materia medica formularia pharmacopoeia - formularia 950.00€

The work is concluded by a letter (inédite) to thee author by Prosper Mérimée. agriculture silk culture technology sericulture lyon education technology - transportation 115.00€

1469 Roonhuyze.-- GEIJL, A. De Geschiedenis van het Roonhuysiaansch Geheim. Een Verhandeling door de Nederlandsche Maatschappij ter Bevordering van de Genneskunst met goud bekroond. Rotterdam, Meindert Boogaardt, 1905. xii,238, [ii] pp. 8vo. (16 x 21 cm.). Original cloth (ourter margin of sided slightly browned). With 2 large folded plates (20 x 50 cm.) of the famous Roonhuysian forceps. Hendrik van Roonhuysen (or Roonhuyze, 1625-1672) was an Amsterdam obstetrician who introduced the first lever in obstetrics in the late 17th Century. It is also called the vectis or the extractor. The lever consisted of a flat piece of iron, bent into a slight curve at both ends, and wrapped it with a soft leather so as to be gentle with the fetal and maternal skin. The instrument was used to displace a face presentation or dislodge an impacted fetal head from the pelvis. He also is considered the author of the first work on operative gynaecology in modern sence (see Garrison & Morton, 6015).--(Foxed in places). gyneacology obstetrics medical instruments verloskunde obstetrical forceps gynaecology - obstetrics 45.00€

762 SPALLANZANI, Lazzaro (1729-1799). Expériences pur servir à l'Histoire de la Génération des Animaux et des Plantes.... Avec une Ebauche de l'Histoire des Etres Organisés avant leur Fécondation; par JEAN SENEBIER. A Genève, Chez Bartelemi Chirol, 1785. [iv], xcvi, 413, [i] pp. 8vo. Contemporary half calf (top and bottom of spine dammaged; one hingle partly worn), marbled edges. With 3 folded engraved plates by Cagnoni. First French edition. Pp. ix comprises: Réfutation de deux imputations faites à M. Senebier par M. Ingenhous. In the present work, Senebier has translated selections on the reproduction of animals and plants from Spallanzani's *Dissertationi di fisica animale e vegetabile*. Spallanzani rejected the, then popular, theory of spontaneous generation. The work also contains two letters written to Spallanzani by Charles Bonnet. Although the matter of spontaneous generation was not solved by this work, it clearly foreshadowed subsequent experiments by other investigators which culminated nearly a century later in Pasteur's epic work. See g&m, 102; H. of Hippocrates, 986; Prandi, *Bibliografia...*, p 83; Nordenskiold pp. 217-218; Needham, *Embryology*, pp. 188-189; Wolf, *XVIIIth Century*, 471. embryology natural history spontaneous generation reproduction zoology botany natural history 385.00€

777 SURINGAR, Gerard Conrad Bernard (1802-1874). De Opvoeding der Zintuigen. Eene bijdrage tot de leer van het Ondewijs, inzonderheid van de Natuur- en Geneeskundige Wetenschappen. Te Amsterdam, bij J.H. Gebhard & Comp. 1855. [iv], iv, [iv], 390, [ii blank] pp. 8vo. Original printed boards (a bit dust soiled and worn in places; slightly loose in binding). A quite remarkable and original work. Coincidentally written in the spirit of Corvisart's *éducation médicale des sens*. Suringar, professor at Leiden, was an excellent clinician and outstanding teacher. His medico-historical contributions are of lasting value, especially his history of medical education at the Leiden University. education paedagogy neurosciences general medicine 165.00€

700 SWAMMERDAM, Jan (1637-1680). *Histoire Naturelle des Insectes traduite du Biblia Naturae* (par Savary, M.** & Gue-neau). Dijon & Paris Decentes, Desaint & Saillant (a.o.), 1758. [iv], xl, 673 pp. 4to (22.5 x 29 cm.). Contemporary half roan with raised bands (some very minor rubbing), entirely uncut. Title and half-title printed in red and black, one folding table, devices and initial letters, a nice vignette, and 36 fine, large folding, engraved plates. A very fine copy with ample uncut margins, and the plates in good impressions. Swammerdam is considered the most accurate of classical microscopists, who was first to observe and described red blood cells. Originally published in two volumes in 1737-1738 through the care of Herman Boerhaave, this work is probably the finest work of microscopical observations produced by Swammerdam, and in many way unsurpassed until the present. "The drawings in this collection surpass all contemporary work in exquisite delicacy and accuracy of detail" (Garrison). This edition was published in the series: *Collection Académique... Tome V de la Partie Etrangère, Et le second volume de l'Histoire Naturelle séparée.*-(A small and light waterstain occurs in the upper margin of a number of pages). microscopy entomology zoology natural history biology microbiology boerhavia microscopy 875.00€

753 SWIETEN, Gerard L.B. van (1700-1772). *Descripcao compendiosa das Infirmades mais commuas dos Exercitos, Com hum novo, facil, e seguro methodo de curar o Mal Venero.* Author O Baram de Van-Switen.... *Accrescentado com algumas notas, emuitas advertencias importantes para os CIRURGIOS DO MAR.* Traduzido na lingua Portugueza por Antonio Martins VIDICAL. Valensa, Antonio Balle, 1764. [xxvi], 242, [ii] pp. Sm. 8vo. Contemporary marbled calf, spine gilt lettered & decorated. A very fine copy of the first Portuguese edition of this famous essay on diseases of military camps. This was one of the most popular works on the subject of the 18th century. First published in German in 1758, it ran through numerous editions and translations. Van Swieten, a pupil of Boerhaave, transplanted the latter's method of teaching to Vienna and founded the Vienna School of Medicine. ".... did much to advance Austrian medicine and created the world-famed Vienna clinic after the Leiden pattern. As a perfect of the Imperial Library at Vienna, which he raised to the first rank, he had great influence upon the advancement of higher and medical education by his reorganization of the University.... As army surgeon, he wrote an important work upon hygiene of troops in camp" (Garrison). g&m 2152. 1392 ZIMMERMAN, Leo M. & Ilza VEITH. Great Ideas in the History of Surgery. Baltimore, Williams & Wilkins company, 1961. xii, 587 pp. Royal 8vo. (18 x 26 cm.). Original publisher's cloth. With numerous plates and illustrations. The aim of this book is not so much to give a conventional history of surgery, but the authors try "to convey a feeling for the growth of surgery by presenting its leading personalities from the beginning of literary records to the present time" and much attention has been paid to the ideas of the surgeons discussed. history of surgery history of medicine instruments surgery 75.00€

744 ZIRKLE, Conway. Evolution, Marxian Biology and the Social scene. Philadelphia, U.P.P., (1959). 527 pp. 8vo. Orig. cloth. A classic of the Cold War. 'The book reveals and explores a pernicious biological cult that dates from the 1860's when Marx and Engels first read Darwin's Origin of Species. Although the founders of communism were willing to accept the concept of evolution, they categorically rejected all parts of the theory which conflicted with the ideals of a socialistic society and extended their party line right through the science of biology'. His analysis of comrades Lysenko and Michurin are particularly fascinating. russia biology michurin lysenko soviet science agriculture polemics history of biology 65.00€

1368 [ARISTOTELES, pseudo]. 814 [CHAUMEL]. -- FUMOUCHE & CHAUMEL DU PLAN-CHAT. Médications de cavités Naturelles. Guide Chaumel pour l'emploi de Topiques Chamel a la Glycérine Solidifiée. Paris, Etabl. Fumouze, (n.d. ca. 1 [viii], 170, [vi advertisements] pp. 8vo. Original decorative boards (spine strip gone; front side loose). With 10 illustrations, and 8 coloured plates by Devy and Franck, of which 4 folded. According to the preface, it was Chaumel who invented the topical administering of various drugs by means of solidified glycerine. The work is a complete guide to the products of Etabl. Fumouze: pessaries and suppositories. Anatomy, description and applications. The work is concluded by a CATALOGUE DES TOPIQUES CHAUMEL a la Gycérine solidifiée préparés dans les Laboratoires des Docteurs Fumouze-Albespeyres, Pharmaciens de 1re Classe (38 pp. with 2 coloured plates of their packed products). -- (Inner margin of the first 2 leaves and folded plates repaired). pharmacy therapeutics pessaries sstockpositories pharmacy - chemistry 85.00€

916 [Corvisart - Boerhaave] STOLL, Maximilian (1742-1787). Aphorismes sur la Connaissance et la Curation des Fièvres... Traduits en Français par J.N. Corvisart... Avec le Text latin. Paris, Régent et Bernard, AN V (1797) xx, 581, [i] pp. 8vo. (13 x 20 cm.). Contemporary marbled calf, spine in compartments gilt decorated (title label gone, top and bottom of spine damaged, corners slightly bumped, joints weak though firm, but a very good inner copy). Text in Latin with the French translation by Jean Nicolas Corvisart des Marets (1755-1821), Napoleon's favourite physician and the creator of cardiac symptomatology. "Stoll was a member of the influential Viennese School which, during his lifetime, became one of the focal points of European medical inquiry. He is generally regarded as a systematist relying heavily on the works of Sydenham. Stoll was one of the few physicians of the Viennese School who supported Auenbrugger's view on percussion. In this treatise on fevers he refers favorably to the practise and, in all probability, it was here that the translator, Corvisart, became acquainted with the subject. This prompted him to translate also Auenbrugger's classic work (1808), which subsequently led to the general acceptance of percussion as a diagnostic practice" (Heirs of Hippocrates 1040). The work itself in fact is by Boerhaave. Cushing S435; Osler 4040 (Latin ed., 1787), Waller 9286. percussion physical diagnosis cardiology pathology fevers Viennese School boerhaave-

774 [Pascal]. -- LELUT, L.F. L'Amulette de Pascal pour servir à l'Histoire de Hullucinations. Paris, J.B. Ballière, 1846. xvi, 371, (i) pp. In-8. Br. originalle. Avec 1 planche dépliant, h.t., représentant un fac-similé de la lettre de pascal trouvée dans son purpoint, après sa mort. Première édition. Intéressant ouvrage dans lequel Lélut s'attache à démontrer que Pascal était un aliéné. Il élabore une théorie des idées: les idées étaient examinées à leur point de départ, puis à leur retour au point de départ. "C'est à ce second état que se rapportent les hallucinations qu'il définit comme des transformations spontanées de la pensée en sensations les plas souvent externes" (Brierre de Boisson, De maladies mentales p. 695). Ainsi Lélut attribue la naissance de Provinciales et de Pensées à l'influence exercée par une hallucination: l'hallucination est un des caractères de la folie, donc Pascal est un fou. - Semelaigne I, 293. psychiatry neuroscience neurology hallucinations pascal neurosciences 200.00€

nary was printed in 1920, the autograph is dated December 1st, 1940. pharmacy pharmaceutical publicity typography ephemera - publicity - trade catalogues 30.00€

752 [RICORD, Philippe 1800-1889 & Jean Nicolas DEMARQUAY 1811-18 Les AMBULANCE de la Presse annexes du Ministère de la Guerre pendant le Siège et sous la Commune 1870-1871. Cet ouvrage est vendu au profit de la caisse de la Société de Secours aux Blessés. Paris, Marc & Baillière, 1872. 373, [iii] pp. Roy. 8vo. Contemporary half brown morocco, spine with raised band, gilt lettered (partly slightly rubbed; corners sl. bumped). With one coloured lithographed folded plan, 7 illustrations in the text and 18 wood engraved plates. A most interesting medico-historic document. The Franco-Prussian War began on July 19, 1870; on September 2, after the battle of Sedan, the principal French army surrendered to the Germans. On September 4 an insurrection in Paris proclaimed the Republic. The Prussian and German forces moved into France. For four months the capital was surrounded and besieged. By January 1871, the bitter siege of Paris was ended, but not for long. The Paris republicans, who had defended France when Napoleon III failed to do so, refused peace on Bismarck's terms. The result was a civil war between the National Assembly at Versailles, and the Paris revolutionary municipal councils known as the Commune. By now the Paris Commune, who lasted from March to May 1871, was attacked by the French. The fighting in Paris was atrocious beyond anything known in any preceding French revolution. The victims were countless. It was on the instigation of Philippe Ricord, the greatest authority on venereal diseases after John Hunter, that a committee was founded to assist the sick and wounded of the Franco-Prussian War. Through the combined effort of his staff and the French press, a national campaign was launched to gather material and volunteers. The result was overwhelming, and an impressive number of fixed, mobile and camp hospitals were installed and became operative. The Ambulances de la Presse, directed by Ricord, existed from September 1870 until June 1871. During that period some 25.00€0 sick or wounded were treated. The first part of this work describes the various (camp) hospitals, their organization and staff; the second part describes the scientific and aspects of the improvised hospitals (including pharmacy); the work is concluded by a 100 pages appendix, giving additional data. At a later date, the Ambulances de la Presse merged with the Société de Secours aux Blessés No copy in the cat. Bibl. Nationale.- (Partly foxed). military medicine first aid franco-prussian war nursing hospitals ambulances surgery military & naval medicine 525.00€

1426 [Slavery].-- VOYAGE dans les états Barbaresques de Maroc, Alger, Tunis et Tripoly; Ou Lettres D'un des Captifs qui viennent d'être rachetés par MM. les Chanoines réguliers de la Sainte-Trinité; SUIVIES D'une Notice sur leur rachat, & du Catalogue de leurs noms. Paris, Chez Guillot, Libraire de Monsieur, 1785. viii, [9]-193, (i), 8 pp. 12mo. (11 x 18 cm.). Sewn, entirely uncut (à la barbe), loose contemporary grey wrappers (spine strip gone); preserved in modern blue blind wrappers. The very rare first edition of a series of letters by a French naval officer who was kept slave in North Africa and bought free by the canons of the Trinitarian order. In it the author gives i.a. a description of Meknès, Salè, Alger, Tunis and Tripoli. The work concludes with a list of 313 French slaves bought free by the Trinitarian order in 1785, who later that year (9th of July) arrived in the harbour of Marseille. Fine copy in pure state as issued (was never bound). With on the title and p. iii the library stamp of the "Pères Trinitaires de Marseille". A German translation was pu-

blished in 1788. Playfair, Algeria 280; Tailliar 1618; ABES (the French Union Catalogus) lists only 2 copies. slavery slaves es-claves north africa barbarism marocco travel voyages maritime history mission charity anthropology varia 975.00€
